## Commercial/Residential Electric Service

### A. APPLICATION FOR ELECTRIC SERVICE

Anyone desiring to receive electric service with Dahlberg Light & Power Co. must fill out an application before receiving use of the company's service. The company reserves the right to require a signed application or written contract in order for electric service to be furnished. If you become a customer of DLP you are subject to our rates, rules and regulations. All applications and contracts for electric service shall be made in the legal name to the party who will be obligated to pay for the electric service.

Subject to it's rates, rules and regulations as established by the Public Service Commission of Wisconsin, the company will continue to supply service until requested to discontinue.

### B. PROCEDURES FOR APPLICATION FOR NEW RESIDENTIAL OR COMMERCIAL SERVICE (NEW CONSTRUCTION)

1. You should contact Dahlberg Light & Power Co. as soon as you have determined a need to have new electric service installed. Someone from the company will discuss your electrical needs with you and determine the availability of electric service.
2. An [Application for new service](#) must be completed and signed by the homeowner, not the contractor. The application will include information regarding your planned electrical load.
3. After the company receives your application, we will make an estimate of the amount of money required as a contribution toward the cost of new electric service. The sum is equal to the amount the Public Service Commission of Wisconsin allows the company to spend to construct the new extension. For any new residential hook-ups installing a new meter, an embedded cost will be applied towards your estimate as a credit and 90' of wire or less will be given at no charge for your service drop.
4. Temporary Service for Construction is available on a short-term basis until your permanent service entrance is furnished. The temporary service entrance equipment and wire must be supplied by the customer or builder and must be approved by the company before we connect the temporary service equipment to our wires. The company charges a fee to connect and disconnect the temporary service entrance equipment. This charge is billed with the cost for the new extension electric service and is paid before the temporary service is connected.

## DAHLBERG LIGHT & POWER COMPANY

9221 East Main • P.O. Box 300 • Solon Springs, Wisconsin 54873-0300 • Telephone 715-378-2205 • Fax 715-378-2505 • 1-800-736-5167

5. When you receive the estimate of the cost for new electric service, you must indicate your desire to proceed with installation of your new service to the company. You must also remit to us any customer contribution amount due (if any) before construction can begin.
6. You may be requested to furnish the company a right-of-way with the rights to clear a defined corridor across your property, at no cost to the company. If needed, a form granting such an easement is provided by the company.
7. A proper service entrance and building wire, as required by the Wisconsin State Electrical Code, must be supplied by the customer. When your service entrance is ready to be hooked up to the company's wires, it is your responsibility to contact the company of the fact. A wiring affidavit signed by your electrician must also be submitted, available from the company.
8. The U.D.C. Inspector will then inspect your service entrance for any violations in the State Electrical Code. If the service meets the requirements of the Wisconsin State Electrical Code and is legal, the company will schedule to hook up your electric service.
9. The company's responsibility is to extend its line to the customer's service entrance. We retain title to every extension and reserve the right at all times to add additional customers to an extension under the rules of the Public Service Commission of Wisconsin without procuring the consent of any customer contributing to the original construction cost.
10. After your electric service has been connected, as a customer, you shall be responsible for all damage done to the company's equipment on your premises and for all losses resulting from interference or tampering with equipment. This includes compensation for any consumed energy not recorded on the meter.
